

BATTERY PACK HAVING PERFORATED TERMINAL ARRANGEMENT**ABSTRACT**

A battery pack containing a plurality of battery modules, said modules
5 comprising a plurality of individual battery units, said battery units comprising a
plurality of bicells with opposing terminals. The battery modules are connected in
series by use of a flexible circuit and by opposing positive and negative terminals of
each battery unit. The terminals of each battery unit contain a region of apertures
which allow the adhesive of the packaging material to seal more effectively, thereby
10 eliminating or reducing the amount of leakage from an individual battery unit.
